# Endodontic Career Pathways

## Early Career Group

### KNOW YOUR OPTIONS

The British Endodontic Society (BES) wishes to encourage any dentist with an interest in endodontics to enhance their knowledge and skills in the speciality. We have listed below some of the possible pathways.

**DISCLAIMER:** This represents possible pathways only as the Society is unable to provide career advice. The pathways listed above are specific to UK registrants.

Non-UK registrants should contact the General Dental Council directly for further guidance.

\* Since June 2018, Health Education England (HEE) has limited provision of NTN in Endodontics to academic trainees (Academic Clinical Fellows) only.

Applicants should check the status of these on application to a Specialty training programme

<sup>#</sup> A guide to postgraduate specialty training in the UK can be found in the Dental Gold Guide, COPDEND, <https://www.copdend.org/downloads-list/dental-gold-guide-2018/>

# Appendix: University Accredited Endodontic Programmes (UK)

University	Specialty Training Programme**	Clinical Training Programme (Masters, Diploma, Certificate)	Distance Learning Programme (Masters, Diploma, Certificate)
